

STATS Materials Laboratories

- UKAS accreditation
- Proven track record

STATS Consulting

- Wholly independent
- Specialist professional support

STATS provides independent specialist consulting and technical services across a wide range of fields including construction, property and facilities management, environmental management and for the controlled use of natural resources, all backed by comprehensive testing and analytical Laboratories.

STATS has proven expertise in the provision of on site materials engineering services to the construction industry, including operation of on site project laboratories. STATS can demonstrate three decades as one of the leading providers of high quality UKAS accredited on site testing services to major infrastructure projects throughout the UK and abroad.
